

want to save securely
the credits for your
file?

want to check the
author and time of
creation of the file?

Upload the file into
the secureFileAuthor
website

the file is converted
into sha256 hash

the sha256 is
compared to already
existing ones in the
contract.

does this hash
already exist
in the contract?

yes

no

file exists in the
contract

update the hash into
the contract with the
author and the
timestamp

display the details of
the file, the author
and the timestamp
